NEXHAB

We specialize in construction, primarily in formwork, steel structures, structural work, electrical, electromechanical, and plumbing services, which are the strengths of our company. We also offer technical consulting, waterproofing, and interior and exterior painting services.

We have strategic partnerships with renowned suppliers and brands, as well as a state-of-the-art team of trained and experienced technical and administrative staff with over 27 years of experience in the civil engineering sector. Our team is equipped with modern equipment that guarantees the quality and efficiency of each project.

Our company has successfully completed 100% of the contracts awarded to it, whether as a sole contractor or in strategic partnership for specific projects or clients. This experience allows us to effectively tackle any type of work, both nationally and internationally, as evidenced by the projects carried out in various locations throughout the Dominican Republic.

MISSION

Satisfying our clients' needs by meeting their expectations and providing integrated services for the development and construction of their projects. We use cutting-edge technologies and materials in innovative, high-QUALITY construction systems. The result is the best experience for our customers.

VISION

To be leaders in the installation, application, and implementation of cutting-edge technologies. We are constantly developing and studying high standards of quality, delivery times, and design, in order to offer the best customer experience, ensuring satisfaction with the work carried out.
